(54) Title: **SOLAR-POWERED BUS STOP**

(57) Abstract: A bus stop illuminating assembly (400) used in public transportation system comprises a solar-powered head assembly (100) for illuminating around said bus stop for security at night and signaling to a bus driver that passengers are waiting; an edge-lit bus schedule assembly (200) to give transportation information to passengers; a post (8) to secure said head assembly and said bus schedule assembly thereon, wherein necessary functions of said head assembly or said schedule assembly are selectively activated by said passengers, by means of a button assembly (300).
